

## **Botany Ambassador Program**

Outreach program of the California Botanical Society

### ***Nemophila* feature writers**

Writers provide an invaluable service to *Madroño*, our authors, and the scientific community. In return, writers receive experience in writing and communicating scientific findings to a general audience.

### **Botany engagement officers**

Officers share their passion and expertise in Botany with K-12 students in the classroom, botanical gardens or outdoor venues. This gives them an opportunity to showcase Botany as a career and develop their communication skills.
